

Paul is Dead

Paul McCartney is not a celebrity himself, but works on the edges of that industry, unhappily toiling away at a tabloid devoted to famous deaths and the public's ongoing fascination with them. But one day he discovers a mysterious red button on a back wall of his new house, which when pressed causes the immediate death of a celebrity sometimes half a world away. And what does this have to do with the eyeball in a glass jar that his biggest fan has recently mailed to him? Find out the darkly hilarious answer in this full-length debut of British absurdist author Stephen Moles. A rousingly bizarre exploration of fame, identity and mortality, this novella will make you laugh and cringe in equal measure, a perfect read for existing fans of Will Self or Chuck Palahniuk. You might not think a book about death would begin with the word life written 27 times in a row, but then you have yet to enter the strange but compelling world of Paul is Dead. Best approached with caution and with tongue firmly in cheek!
