

Stonepackers Gold

Willie Urgang arrives in Salt Lake City, 1920. Fleeing a bad marriage back home in Kansas, he soon is drawn into a romance and thence into a convoluted struggle to obtain a stack of gold plates. The Mormons think that the plates are worth more than their weight, because they are rumored to be inscribed with the testimony of Thomas Stonepacker, a contemporary of Samuel Brannan and Brigham Young. But the Mormons department of dirty tricks is foiled by a wily band of Jesuits intent on melting the plates if they affirm Joseph Smiths revelations, or publishing them if otherwise. Rafael Lopez, an historical figure, disappeared into a mine in 1912 after killing half a dozen deputies. His body was never found, and it is revealed that he escaped the mine. Willie is abducted by Lopez into an underground scheme to defraud all the interested parties, including a gaggle of Masons. A faithful translation of Thomas Stonepackers testimonial is included in an epilogue.
