

The Ten Symphonies of Gorka König

Subtitled a Fictional Textbook, *The Ten Symphonies of Gorka König* is at first sight a fictitious musical biography interwoven among the historical events of the twentieth century, but as usual with Dallas there is more to it. He utilises the books mesmerising structure and his writers art to impart an understanding of our modern age. In that sense *The Ten Symphonies of Gorka König* is an activists book. It is also one of the great unsung masterpieces of twentieth century literature.
